

## At your finger tips

Today we are surrounded by Smart TV's, Smartphones, Smart Apps and even Smart Kids we call Millennials... At the touch of a button we warm our food, switch on the air-conditioning or use navigation systems to guide us. Technology has made it possible for us to work **SMARTER**. And technology also makes it possible for us to be smart about managing the tyres in our fleets.

As early as the 1990s **Bandag** embraced advances in information technology. We brought you stand alone tyre management, tyre inspection and scrap tyre analysis software. Our database now holds information of more than **350,000** scrap tyres. With the advances in technology, **Bandag** is at the forefront, embracing these new technologies and today

offers a fully integrated online solution comprising of **ProTrubo**, **ProOosta**, **ProWheel** and **ProTracker**. These are all used to manage and maintain the tyres of fleets across Southern Africa, with the information available, **at your fingertips!**

Being early adopters of digital inspection tools, **Bandag** and its franchisees are embracing the use of Smartphones and Tablets. **Bandag** is now utilising an **Android App** with **Bluetooth probes** to collect tyre inspection information that is uploaded to its web services at the push of a button. This translates into **quicker reporting** with more **accurate information**.

Because sitting still is not part of **Bandag's DNA**, there are even more exciting and innovative developments to come. These developments and new tools don't mean you lose the physical need to work with your hands or that our technical staff become tech junkies... quite the contrary in fact. Rather, it enhances their ability to offer a **modern solution to a modern transporter** and goes to support an old adage – don't work hard, work **SMARTER!**

**With Bandag, you don't have to be a tyre expert. You just have to know one!**

Bandag specialises in the manufacture of retreads and best-in-class after sales service. That's what we do!

For more information please contact **Bandag** on 011 439 6000 or visit the website at [www.bandag.co.za](http://www.bandag.co.za).

### BRING IT ON!

With the reliability you get from Bandag, your fleet can take on anything.
