

# What makes Bandag retreads RELIABLE?

**RELIABILITY** is one of those words so casually thrown around... But what is **RELIABILITY** and more importantly what makes **Bandag** retreads reliable?

Dependable, trustworthy... These are some of the popular definitions you can come across if you search the term **RELIABILITY**. **Quality** is another aspect that ensures the **RELIABILITY** of a product and for **Bandag**, both are non-negotiable. So now you might say **Bandag** is using these words casually... But are we???

With multiple ISO certifications, strict global audits and an internal culture for **quality**, **Bandag** aims to deliver a **RELIABLE** product to ensure its customers are fully satisfied.

At the same time, we know that our retreads must be applied to retreadable casings. We know that inferior casings will affect the **RELIABILITY** perception of a **Bandag** retread. Most importantly, we know that strict manufacturing levels must be adhered to in order to deliver a **Reliable Bandag** product.

How does your claim rate compare to the **Bandag** national average? How many casings that should have been rejected were 'salvaged' and subsequently retreaded? How much has that cost you in on-road failures and claims? Would you like to know? Would you like a partner you can **RELY** on?

**With Bandag, you don't have to be a tyre expert. You just have to know one!**

Bandag specialises in the manufacture of retreads and best-in-class after sales service. That's what we do.

For more information on how you can benefit contact Bandag today on +27 11 439 6000 or visit [www.bandag.co.za](http://www.bandag.co.za).
